Pam Kaye

SEATAC is hours away from me. So I drive an hour to another town where I can park my car, catch an airport shuttle, and ride another two hours to the airport. I have to pay to park (think it's about $12.00/night) and pay for the shuttle round trip (about $55.00). I also charge for the RT mileage to the parking lot (100 miles). Sometimes I need to go to SEATAC the night before or stay there the night I go home, depending on how late or early a flight leaves or arrives. I always let the Club know if this has to happen.
